August 20, 2012

Dear Correspondence Unit,

On March 20, 2012 you were sent a letter and documentation regarding a federal civil rights infringement by the Pennsylvania Public Utilities Commission. On June 29, 2012, three (3) months later you saw fit to reply to said letter and documentation. The letter is enclosed. There is no date of my correspondence being received by you. There is no reference number to which it would be possible to refer to the original complaint letter. There is nothing of any reference or of use in any reply to your 67 word letter.

It is a shoddy and completely unprofessional attempt to confound my original complaint.

In your response you stated that I had not provided you with sufficient information to enable you to determine whether a violation of a federal civil rights violation is involved. Enclosed with my original communication to you titled: **PA Public Utilities Commission Illegally Processed and Administered Formal Complaints** were two documents that described the circumstances and are below listed:

Pennsylvania Public Utilities Commission (PA PUC) Formal Complaints 2827 words

Illegally Administered and Processed Formal Complaints 1899 words

The contents of these two letters; together with my original correspondence to you; explains the violation of not only my own civil rights and liberty, but of millions of others throughout the United States. You are aware of their suffering and have abandoned your own population by allowing this nightmarish scenario to continue unhindered, even going so far as to assist and instruct other government agencies and various corporations to legally equivocate the consequences.

You have even gone so far as to invent a name for the side-effects of the emissions deriving from the Smart Grid Initiative's associated equipment; that being "Electromagnetic Hypersensitivity" when, in actual fact, these side-effects already have known consequences and given names, that being "Acoustic Shock" and "Microwave Radiation Exposure". Further, that in so doing you have placed economic stimulus and corporate profits in a preferable position to your own population's health and well-being.

These aforesaid emissions immediately affect at least 10% of the population, with 22% being affected within a short period of exposure. These emissions are not selective; children as young as 4 years old experience partial on-going paralysis; a wide cross-section of the population is experiencing arrhythmia and ventricular fibrillation among other physical debilitating effects. Mental instability is a widely common side-effect of exposure to this equipment's emissions.

The above statements have been validated and are backed by 100% irrefutable evidence which has been corroborated and documented USA-wide, North America-wide, and worldwide.

This is an on-going US federal formal complaint. My Civil Rights, Liberty, Human Rights, and Right to Life have been violated in the extreme. My legal rights to a fair and unbiased hearing have been violated by the Pennsylvania Public Utility Commission's and Attorney General's Offices government employees by making, with intent, in-camera judicial decisions and by not informing me, the Complainant, of those judicial decisions in a proper and timely manner. None of the evidence, submitted by me, was or has been taken into account during these illegal judicial decisions. In fact, the PA PUC did not allow me to present my evidence on the record and the Administrative Law Judge left the hearing room for the entire of my testimony which was also not allowed to be on record.

I demand justice and a fair, unbiased hearing in a federal court for both myself and for millions of others in the USA that are being affected by these Smart Grid Initiative's equipment's emissions which have already claimed thousands of lives across the USA. Until such time that this Smart Grid Initiative equipment is removed you are complicit and guilty with intent of killing and maiming your own population.

Yours sincerely,

Victor Nixon
